MEMORANDUM FOR: Chief, Materiel Division, OSA

SUBJECT : Recommended Spare Parts for the Hyperion
Clock Interface Package

1. As a result of discussion between personnel from Materiel, Depot, and Contracts, it was decided to purchase as spares three complete sets of boards for the Time Index to be used as spares support.

2. The Contractor has suggested that complete sets of boards would probably prove superfluous and has suggested that one of each type of board should be adequate for field maintenance, since he feels that it is highly unlikely that all of any particular type would fail at any one time and even if such should be the case, the correction of the cause of such a failure would probably require factory overhaul. As an alternative, the Contractor has submitted the enclosed recommended spare parts list to be furnished each Detachment.

3. Please advise whether you concur in these recommendations. The deletion of those boards that the Contractor feels unnecessary results in a reduction in price of approximately
